EDUCATION

Western Governors University   **Salt Lake City, Utah**
B.S. in Computer Science   *Expected Graduation, Dec 2025*
- **GPA:** 4.00/4.00

PROJECTS

Expense Tracker   **noman-expense-tracker.com**
- Developed a full-stack expense tracker application using Next.js, React, Tailwind CSS, and Drizzle ORM, featuring social authentication, a dynamic dashboard with real-time analytics, and a responsive design for mobile-friendly use.
- Enabled effective budget management by providing users with tools to track and plan their monthly and weekly expenses through a user-friendly interface and real-time analytics.
- Integrated secure social authentication and enhanced user interaction with real-time expense tracking and budget management.

Isekai Station   **dainty-frangollo-b7bd23.netlify.app**
- Crafted a visually appealing website using advanced CSS techniques and Bootstrap, ensuring a responsive and user-friendly interface across all devices.
- Applied modern UI/UX principles by creating intuitive navigation, interactive components, and consistent branding, enhancing overall user experience and engagement.
- Optimized website performance by utilizing Bootstrap's grid system and pre-built components, along with custom CSS, to achieve fast load times and seamless interactions.

Personal Portfolio   **nomanpatel.com**
- Implemented modern UI/UX principles to create an engaging user experience, incorporating smooth navigation, interactive elements, and consistent branding throughout the site. management.
- Designed and developed a visually appealing and responsive personal portfolio website using React, showcasing projects, skills, and experience with a user-friendly interface optimized for both desktop and mobile devices.
- Integrated contact forms and social media links to allow visitors to easily connect with me for professional opportunities and networking.

EXPERIENCE

PCI Pharma Services   **Philaphiaphia, Pennsylvania**
Mechanic   *Feb 2024 – Current*
- Implemented and optimized system functionalities, executing minor updates and refactorings that led to a 25% increase in product efficiency.
- Identified, tracked, and resolved development issues by collaborating with the engineering team, ensuring compliance with project specifications and improving overall system performance.

KVK Tech   **Newtown, Pennsylvania**
Mechanical Technician   *Jul 2023– Feb 2024*
- Collaborated with stakeholders to deliver expert insights on maintenance strategies, enhancing equipment system performance, and ensuring adherence to company policies, GMPs, and safety standards.
- Implemented preventive maintenance strategies and conducted thorough diagnostics to identify and rectify inefficiencies, resulting in a 25-28% increase in daily production and a 15% reduction in maintenance time.

International Vitamin Corporation   **Philaphiaphia, Pennsylvania**
Maintenance Technician   *Oct 2021 – Jan 2023*
- Enhanced production efficiency by working across three different production lines, performing equipment repairs, preventive maintenance, and changeovers, leading to a 25% increase in average shift production.
- Led troubleshooting and preventive maintenance for heavy machinery, ensuring continuous production by solving complex mechanical and technical problems.
